**Re: Bridgeton Landfill, LLC
Notification of Intend to Abandon Monitoring Wells
Monitoring Wells LR-104 and PZ-305-A1**

To Wellhead Protection Section:

In accordance with 10 CSR 23-3.110, Bridgeton Landfill, LLC intends to abandon groundwater monitoring wells LR-104 and PZ-305-A1. The wells are not part of any known ongoing site permit, monitoring program, or remedial action. The location of these wells conflicts with a pending construction project essential for leachate management by the facility. The attached figure indicates the location of these wells within the site boundaries. Bridgeton Landfill will utilize the services of a permitted well installation contractor to abandon and plug the wells consistent with applicable state regulations. As the construction project in question is of immediate need for site operations the abandonment of these wells is scheduled to occur in early April of 2016. Please contact me directly with any concerns or objections within 30 days of receipt of this letter.

Sincerely,

Derek Bourchard

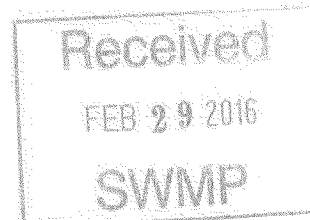

Environmental Specialist
